

## Statement of Intent addressing COVID Stage 4 Restrictions.

To all Erntec Partners, Team and Customers

Following the Victorian Government's guidelines for Business - Stage 4 restrictions, Erntec advises that our manufacturing operations should fall within the following categories under 'Open (for on-site work) - COVID Safe Plan:

- Telecommunications infrastructure
- Goods and material necessary for or related to supporting defence and security industries
- Medical equipment and PPE including cloth masks
- Manufacturing to support critical infrastructure public works

Whilst Erntec has already been operating under a COVID safe plan since first restrictions were put in place we are reviewing and working on a detailed written plan to ensure we will comply at highest level with stage 4 restrictions.

**We therefore intend to continue operating within guidelines and until any further changes in policy is set by government authorities.**

As always, we take our duty of care for our vendors, team and customers very seriously and will do our utmost to ensure we comply with all recommended measures on-site and whilst working at home to ensure upstream & downstream risks are minimal.

Whilst the situation is dynamic, we ask that you all factor in the possible effects on delivery as follows:

- Delays due to Additional COVID Safety procedures introduced in the supply chain.
- Raw material and sub- contractor delays.
- Capacity due to any staff shortages because of testing and isolation where required.

Please feel to contact us if you require any further information

**Managing Director**
